Professional Summary

AI Automation Engineer with hands-on experience building 9+ production-grade workflows using n8n, Make (Integromat), and Zapier – covering lead generation, lead capture, lead nurturing, and email outreach with open and click tracking. Skilled in webhook-based architectures, REST APIs, Docker, and self-hosted n8n infrastructure. Built production-ready RAG pipelines using Python, LLaMA 3.1, and ChromaDB. Complementary background in SQL, Python, and Power BI for data-driven decision-making.

Professional Experience

AI Automation Engineer (Contract) Oct 2025 – Present
GetRepaired.de, Germany (Remote)

- Built and deployed production n8n workflows covering the full lead lifecycle—lead generation, capture, nurturing, and automated email outreach—reducing manual processing time by 10+ hours/week.
- Designed and implemented a **lead generation pipeline** that automatically discovers, qualifies, and routes inbound leads from multiple sources using webhook triggers and HTTP Request nodes.
- Built **email open and click tracking system** using pixel-based tracking and redirect workflows, enabling real-time visibility into outreach campaign engagement.
- Architected a **webhook-based parent–child workflow pattern** to eliminate execution timeouts and queueing bottlenecks, improving workflow reliability to near **100% uptime**.
- Implemented dynamic email sequencing and lead scoring logic using JavaScript Code nodes, enabling personalized multi-step outreach based on lead behavior.
- Set up and configured **self-hosted n8n instance** on cloud infrastructure with Docker, SSL, and PostgreSQL – giving the company full data ownership with zero monthly SaaS cost.

Projects

Get Repaired RAG Chatbot | *Python, LLaMA 3.1, ChromaDB, Groq API, Streamlit* Feb 2026 – Present

- Built a production-ready RAG pipeline for a German repair marketplace that answers customer queries using only the business knowledge base – eliminating hallucinated or incorrect responses.
- Implemented **hybrid search** combining semantic vector search (ChromaDB) and BM25 keyword search to improve retrieval accuracy over standard vector-only search.
- Added **LLM-based query rewriting and re-ranking** to select the 3 most relevant document chunks before generating the final answer, with conversation memory and source citations deployed live on Streamlit Cloud.

Indian Startup Funding Analysis | *Python, Pandas, Matplotlib, Seaborn* Aug 2024 – Oct 2024

- Cleaned and processed **2,000+ funding records** across 50+ columns by removing 1,200+ duplicates and standardizing formats, achieving **98% data accuracy**.
- Generated 15+ analytical summaries using grouping and aggregation to identify top investors, funded sectors, and funding trends.

Adventure Works Sales Performance Dashboard | *Power BI, DAX* Aug 2025 – Nov 2025

- Designed a star-schema data model connecting **8+ fact and dimension tables** for optimized query performance.
- Created **25+ DAX measures** enabling dynamic KPI tracking across 10+ regions and 5+ product categories.

Skills

AI & Automation: n8n, LangChain, RAG, Make (Integromat), Zapier, AI Agent, OpenAI, Claude API
Development: JavaScript, Python, Webhooks, REST APIs, Workflow Orchestration, Docker, PostgreSQL
Lead Generation & Email: Lead Capture, Lead Nurturing, Email Outreach, Open & Click Tracking, SMTP, Brevo
Data Analytics: Excel (VLOOKUP, INDEX-MATCH, Pivot Tables, Power Query), SQL (Joins, CTEs, Window Functions)
Visualization & BI: Power BI (DAX, Data Modeling, Dashboards)
Tools: MySQL Workbench, Jupyter Notebook, Git, Linux, Hetzner, ChromaDB, Streamlit

Education

Smt. Kashibai Navale College of Engineering, Pune 2019 – 2023
Bachelor of Engineering – Electronics & Telecommunication *CGPA: 8.48 / 10*
