Abhishrut Giradkar

AI Automation Engineer | Workflow Automation | n8n & LLM Integration

Pune, India | +91 9503697952 | abhishrut.giradkar13@gmail.com
linkedin.com/in/abhishrutgiradkar | github.com/AbhishrutG | abhishrutg.github.io/Portfolio

PROFESSIONAL SUMMARY

AI Automation Engineer with hands-on experience building production workflow automations in n8n, Make, and Zapier, covering lead generation, email outreach, REST API and webhook integrations, and LLM-powered processes (OpenAI, Claude). Cut manual processing by 10+ hours/week and delivered self-hosted automation infrastructure on Docker and PostgreSQL.

SKILLS

Automation & Workflow: n8n (AI Agent node, Sub-workflows), Make, Zapier, Workflow Orchestration, Process Automation, Webhooks, REST APIs

AI & LLM: OpenAI API, Claude API, Perplexity API, Prompt Engineering, LLM Tool/Function Calling, AI Agents

Integrations & Data: Google Sheets, Google Places API, PostgreSQL, SQL, JSON

Development & Infrastructure: Python, JavaScript, Docker, Git/GitHub, Linux

Data & BI: SQL, Python (Pandas), Power BI (DAX, Data Modeling)

Lead Generation & Email: Lead Capture, Lead Nurturing, Email Outreach, SMTP, Brevo

PROFESSIONAL EXPERIENCE

AI Automation & Solutions Engineer (Contract)

Oct 2025 – Present

GetRepaired.de, Germany (Remote)

- Designed and deployed production n8n workflows covering the full lead lifecycle (generation, capture, nurturing, and automated email outreach), reducing manual processing time by 10+ hours/week.
- Built a webhook-based lead pipeline that discovers, qualifies, and routes inbound leads from multiple external sources via REST APIs and HTTP Request nodes.
- Applied prompt engineering and LLM tool/function calling (OpenAI, Claude) in n8n's AI Agent node to enable reasoning-based automation.
- Re-architected core workflows into modular sub-workflows, eliminating execution timeouts and improving reliability to near-100% uptime.
- Set up and administered a self-hosted n8n instance (Docker, SSL, PostgreSQL) on cloud servers, giving the company full data ownership at zero SaaS licensing cost.
- Resolved 10+ production issues (authentication, UI/UX, data rendering) using AI-assisted debugging with zero regressions, and maintained Git version control for the live codebase.

PROJECTS

Automated Lead Generation System for Export Businesses

Sep 2026 – Oct 2026

n8n, Google Places API, Perplexity AI, OpenAI, Google Sheets | Freelance Client Project (Fiverr)

- Built an end-to-end n8n pipeline that finds businesses by city and industry through the Google Places API and removes closed or inactive companies.
- Integrated Perplexity AI to verify recent proof that each company is actively operating, then extracted genuine email addresses and WhatsApp numbers from company websites.
- Used OpenAI to score each lead from 0–100 and exported ranked, verified leads to Google Sheets, replacing hours of manual research with minutes for any city or industry.

Indian Startup Funding Analysis

Jan 2024 – May 2024

Python, Pandas, Matplotlib, Seaborn, SQL

- Cleaned and processed 2,000+ funding records across 50+ columns, removing 1,200+ duplicates and standardizing formats to achieve 98% data accuracy; generated 15+ analytical summaries on top investors and funding trends.

Adventure Works Sales Performance Dashboard

Jun 2024 – Dec 2024

Power BI, DAX, Data Modeling

- Designed a star-schema data model across 8+ fact/dimension tables and built 25+ DAX measures for dynamic KPI tracking across 10+ regions and 5+ product categories.

EDUCATION

Smt. Kashibai Navale College of Engineering, Pune

2019 – 2023

Bachelor of Engineering – Electronics & Telecommunication | CGPA: 8.48 / 10
